

Portable Branch Kit

SD-WAN Router: XR600P

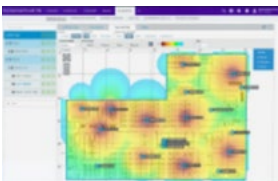

- 6 x 1 Gigabit Ports (4 PoE+)
- USB for LTE Modem
- SD-WAN/VPN Optimization
- L2-L7 Firewall
- VRRP
- DHCP/NAT
- [XR600P Data Sheet](#)

Wireless: AP305C (802.11ax)

- Wi-Fi 6 Certified
- 2.4GHz and 5GHz Access Point 2x2:2
- SSR Radio Modes (Can Run Dual 5GHz)
- WPA3 Support
- L2-L7 DPI/Firewall
- [AP305C/CX Data Sheet](#)

Management: ExtremeCloud™ IQ

- 3rd-Gen Cloud Networking Platform
- AI/ML-Driven Insights
- Flexible Deployment Options
 - Public, Private, Local
- Highly Secure: ISO27001 Certified
- Native Cloud Management of Wi-Fi, Switching, and SD-WAN
- [ExtremeCloud™ IQ Data Sheet](#)

Enabling Plug-and-Play Teleworker/Telelearner and Remote Office Connectivity

The Extreme Portable Branch Kit is a curated solution for rapid deployment of branch office networks. Providing a “work anywhere” capability the Portable Branch Kit delivers essential networking capabilities to connect, secure, and manage remote network sites as well as manage teleworkers. Whether you need a solution for a few hours, a few days, or even for a few years, the Portable Branch Kit provides the functionality necessary to provide an enterprise class experience for all connected users, wherever they might reside.

Components of the Portable Branch Kit

The Extreme Portable Branch Kit includes:

- **Powerful SD-WAN Router** — which supports flexible WAN connectivity, secure VPN capabilities, integrated LAN/ PoE support and stateful firewall support.
- **Latest Wi-Fi Technology** — a highly efficient, highly secure Wi-Fi 6 AP that offers programmable radios, dynamic RF management, WPA3 support and more.
- **Simple Cloud Management** — which will streamline every aspect of IT operation from deployment to support; available in 1, 3- and 5-year subscription options.

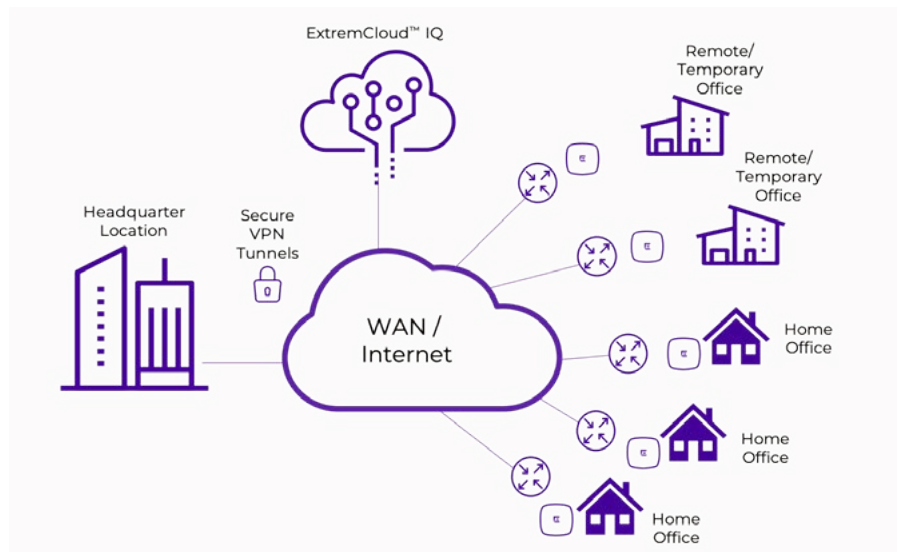

Figure 1: Portable Branch Kit

The Values of the Portable Branch Kit

Smart

- **Rapid Deployment** — New locations can be up and running in minutes with zero touch provisioning. Simply connect the router to the Internet and your AP to the router and the devices will self-configure without the need for local IT expertise.
- **Flexible WAN Connectivity** — Ability to connect remote sites with whatever WAN connectivity is readily available (Broadband, LTE, MPLS).

Simple

- **Centralized Cloud-based Orchestration and Management** — Remote locations without IT resources managed through a single user-friendly interface.
- **Prevention of Remote Office Sprawl** — Integrated LAN/ PoE, Wi-Fi, WAN and security capabilities are provided in a cost-effective, space-efficient bundle, preventing the need for additional infrastructure components.
- **Simple Traffic Prioritization** — Prioritize traffic from groups of users (all executives) and/ or prioritize applications (video conferencing) over single / multiple connections.

Secure

- Secure teleworker / VPN capabilities: Highly secure tunnels to support home-based workers as well as secure site to site connectivity.
- Integrated security features: L2-7 firewall on the router and AP with advanced Wi-Fi security features such as WPA3, Private Pre-Shared Keys and more.
